Airports: Photographs and Facility Data (listed alphabetically by city)	1-67
Flight Plan	Inside back cover

Greetings:

The South Carolina Aeronautics Commission (SCAC) has prepared and distributed the airport directory for the purpose of making your flights in South Carolina safer and more enjoyable.

The information contained was acquired during surveys and inspections conducted by SCAC staff. Airports listed in the directory are either publicly or privately owned and are available for public use. Updates to the directory are posted on our website at www.scaeronautics.com.

Due to constantly changing airport information, SCAC assumes no responsibility for any action taken by a pilot on the basis of information contained herein. The publisher assumes no responsibility for the accuracy of the information presented. Pilots are reminded that it is their responsibility to verify information by checking Federal Aviation Administration Notices to Airmen and the Aeronautical Information Manual.

SCAC welcomes any suggestions to improve the quality of the directory.

Safe flying,

A handwritten signature in black ink, appearing to read "James D. Stephens". The signature is fluid and cursive, with the first name "James" being the most prominent.

James D. Stephens
Director
South Carolina Aeronautics Commission

2553 Airport Boulevard, West Columbia, South Carolina 29170

State of South Carolina
Office of the Governor

NIKKI R. HALEY
GOVERNOR

1205 PENDLETON STREET
COLUMBIA 29201

Dear Friends,

Located throughout the Palmetto State, public-use airports play a vital role in our state's economy. From the shipment of goods to the transportation of people, our airfields support our citizens, businesses, and visitors by providing time saving and convenience for all travelers. Whether your trip is for business or recreation, the *South Carolina Airport Directory and Pilots Guide* is a valuable resource for pilots. Compiled by the South Carolina Aeronautics Commission, the guide provides important information and aerial photographs to help meet your travel needs.

Michael joins me in thanking you for your interest in South Carolina's air travel options. We wish you a safe and enjoyable flight.

My very best,

A handwritten signature in blue ink, reading "Nikki R. Haley".

Nikki R. Haley

AUTOMATED WEATHER OBSERVATION SYSTEM

The Automated Weather Observation System (AWOS) enhances safety by providing critical airport weather information to pilots to be used for flight planning and in-flight decision making. The system provides real-time weather observations including wind, visibility, current weather, sky conditions, temperature, dew point, altimeter setting, and remarks, such as density altitude and local airport conditions.

South Carolina has an integrated system of 29 AWOS sites at airports in South Carolina that are maintained by the South Carolina Aeronautics Commissions (SCAC) office. An additional twelve weather observation sites maintained by the Federal Aviation Administration (FAA) are located at airports in South Carolina.

AWOS information can be accessed in a variety of ways, including radio frequency, telephone, and weather terminals at airports with AWOS. All AWOS information is disseminated nationwide through a system called NADIN, making it available to sources like Flight Service Stations, the National Weather Service, and Weather Channels.

What every pilot should know about AWOS

Wind

- Taken every second and a running two-minute average is updated every five seconds
- Wind speeds of less than three knots are reported as calm
- If the difference between the highest five second average and two minute average exceeds five knots, gusts are reported
- Wind direction is reported from the nearest ten degree magnetic heading

Visibility

- Readings are taken every fifteen seconds and are averaged over a ten minute period

Present weather

- A precipitation sensor samples every fifteen seconds
- Temperature and visibility measurements are used to determine precipitation type

Sky conditions (ceilings)

- Readings are taken every 30 seconds and averaged over a 30 minute period
- Ceiling measurements are rounded as follows:
 - o Nearest 100 feet up to 5,000 feet AGL
 - o Nearest 500 feet from 5,000 -10,000 feet AGL
 - o Nearest 1,000 feet above 10,000 feet

Temperature and dew point

- Four, one minute averages are used to determine the temperature

Altimeter (barometric pressure)

- Pressure sensors take readings every ten seconds and a one minute average is calculated

Remarks

- A calculated density altitude report is provided, if density altitude is greater than 1,000 feet above the airport's field elevation
- Occasionally, airport managers will provide recorded remarks regarding NOTAM'S or local airport conditions

AWOS is maintained by the SCAC and is continuously monitored to ensure its operational status. Individual sites are also maintained and calibrated on a regular basis to ensure reliability and accuracy. As with an electronic device, care must be used when interpreting data. By knowing how AWOS data is collected, a pilot can better understand the information they are receiving.

KEY TO AIRPORT INFORMATION

1. Name	Airport FAA ID and Name
2. Chart	FAA Chart and Sectional
3. Information Date	Data Information Date
4. Associated City	Airport FAA ID and Name
5. Latitude	Airport Latitude
6. Longitude	Airport Longitude
7. Aerial View	Aerial View of the Airport Runways and Approaches
8. Elevation	Elevation of the Highest Point on Runway.
9. Magnetic Var	Magnetic Variants in Degrees and Direction
10. ID	Runway ID
11. Length	Length of Pavement/Turf End-to-End
12. Width	Width of Pavement or Turf
13. Surface	Runway Surface (asph, turf etc) Type
14. VGI	Visual Glide Slope Indicators (noted for each end)
15. REILS	Runway End Identifier Lights Sys (noted for each end)
16-17. Lights	Lights to Aid Landing Craft
18. Pattern	15-RH Indicates 15 Has Right Hand Traffic Pattern
19. Runway	Runway ID
20. SW	Gross Weight for Single Wheel Aircraft
21. DW	Gross Weight for Dual Wheel Aircraft
22. DTW	Gross Weight for Dual Tandem Wheel Aircraft
23. DDTW	Gross Weight for Double Dual Tandem Wheel Aircraft
24. Ident	Navigation Aid Identification
25. Type	Type of NAVAID (NBD VOR etc)
26. FREQ	NAVAID Frequency
27. DIRECT/DIST	Direction and Distant to Airport
28. Communications (Towered Facility)	
Tower	Tower's Frequency
GRND	Ground Control Frequency
CL DEL	Clearance and Delivery Frequency
ATIS	Automatic Terminal Information System Frequency
ATC FREQ	Air Traffic Control Service Frequency
ATC FAAID	Air Traffic Control Service FAA Identification
RCO	Remote Control Outlet Frequency
BRNG/FREQ	Approach/Departure Bearings and Frequencies
28. Communications (Non-Towered Facility)	
Unicom	Unicom Frequency
CTAF	Common Traffic Advisory Frequency
GCO	Ground Control Outlet Frequency
RCO	Remote Control Outlet Frequency
ATC FREQ	Air Traffic Control Service Frequency
ATC FAAID	Air Traffic Control Service FAA Identification
29. AWOS Freq	Automated Weather/Surface Observation System Frequency
30. AWOS Phone	Automated Weather/Surface Observation System Phone

DVFR							

8. ROUTE OF FLIGHT

9. DESTINATION (Name of airport and city)	10. EST. TIME ENROUTE		11. REMARKS
	HOURS	MINUTES	

12. FUEL ON BOARD	13. ALTERNATE AIRPORT(S)	14. PILOT'S NAME, ADDRESS & TELEPHONE NUMBER & AIRCRAFT HOME BASE	15. NUMBER ABOARD
HOURS	MINUTES		

16. COLOR OF AIRCRAFT	CIVIL AIRCRAFT PILOTS. FAR Part 91 requires you file an IFR flight plan to operate under instrument flight rules in controlled airspace. Failure to file could result in a civil penalty not to exceed \$1,000 for each violation (Section 901 of the Federal Aviation Act of 1958, as amended). Filing of a VFR flight plan is recommended as a good operating practice. See also Part 99 for requirements concerning DVFR flight plans.
